INSTRUCTIONS TO BUILD YOUR VERY OWN

science seeds

STACKABLE STAR TREE

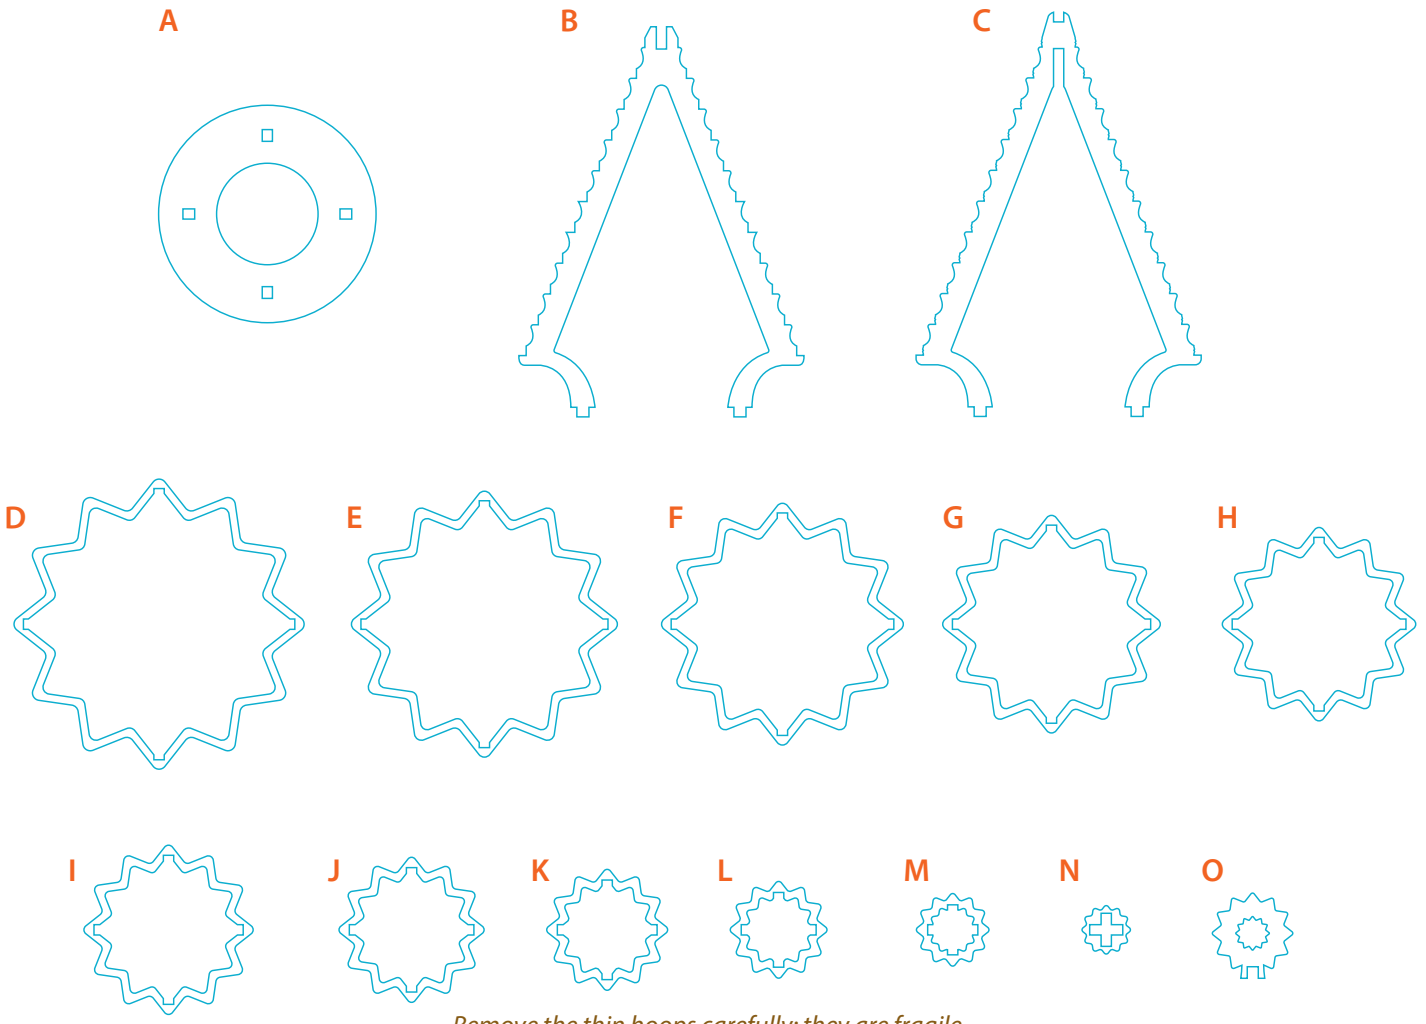

BACKGROUND

Our stackable holiday tree is easy to build and decorate. Color the star hoops to make it your own, or add fairy lights to make it shine. It comes apart again, so you can bring it out year after year!

PREP

- The hoops are held to the board and to each other by thin tabs. Wiggle each piece gently back and forth to free it, without forcing it: the thin hoops can bend or break.
- Lay out your pieces so you can find them easily.
- Decorate with markers or paint. Coloring the pieces before you build is easiest.
- Your tree is laser cut from natural plywood, so some pieces may fit a little snugger or looser than others.
- If a piece feels tight, smooth the edge with sandpaper (not included).
- The tree fits together without glue. If a fit feels loose, a dot of wood glue will hold it. **Leave the hoops unglued so you can take the tree apart and store it flat.**

PARTS INCLUDED IN THIS KIT

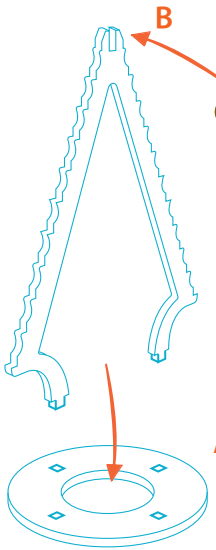

Remove the thin hoops carefully: they are fragile.

- A Stand base
- B Stand side 1
- C Stand side 2
- D Hoop 1
- E Hoop 2
- F Hoop 3
- G Hoop 4
- H Hoop 5
- I Hoop 6
- J Hoop 7
- K Hoop 8
- L Hoop 9
- M Hoop 10
- N Hoop 11
- O Star-shaped cap

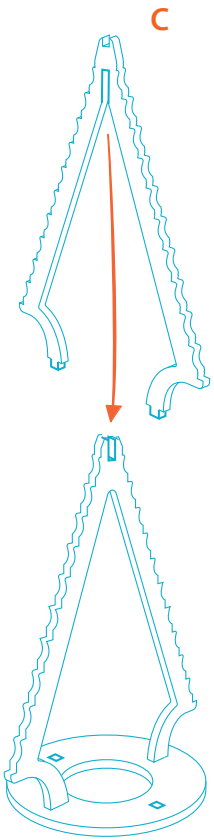

Scan for interactive instructions

Your kit may include spare pieces.

BUILD THE STAND

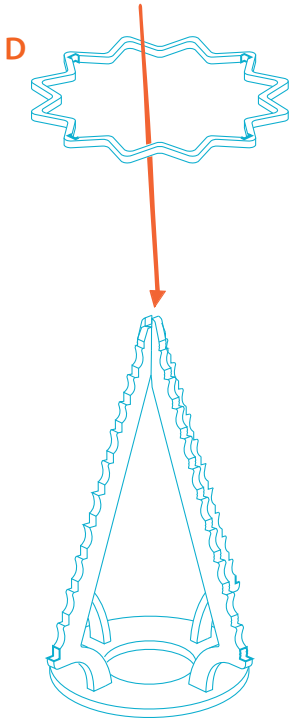

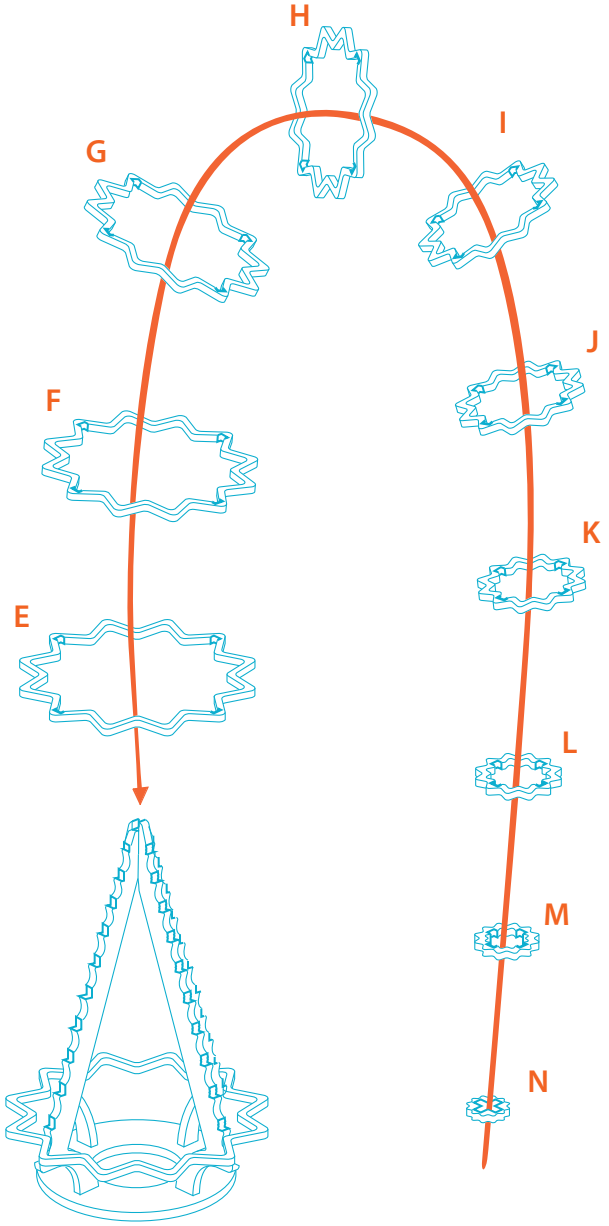

1. Press side 1 (B) into the base (A). Don't press on the top of the stand.

2. Slide side 2 (C) over side 1 and into the free slots.

ADD THE HOOPS

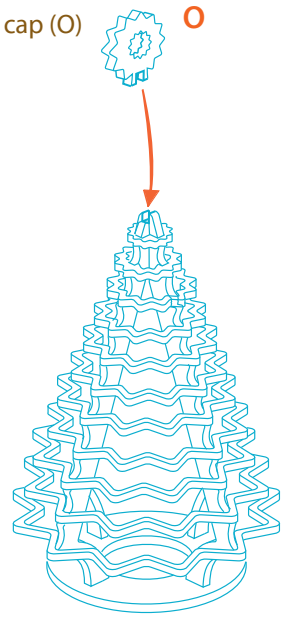

3. Drop the hoops onto the stand, largest (D) to smallest (N). Each rests on the stand's edges; its notches hold it in place.

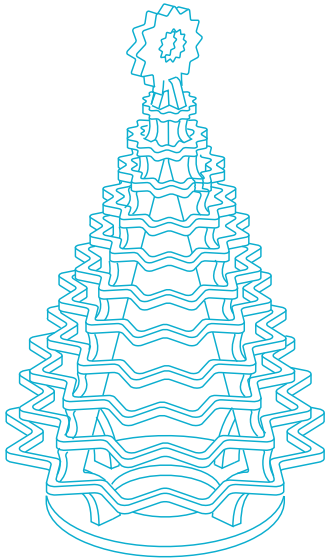

ADD THE CAP

4. Add the cap (O) on top.

CONGRATULATIONS

YOU DID IT!
